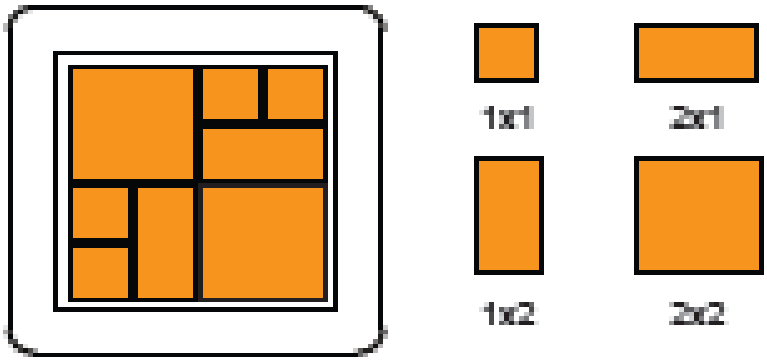
Desktop Management

Know more about desktop and C-blocks.

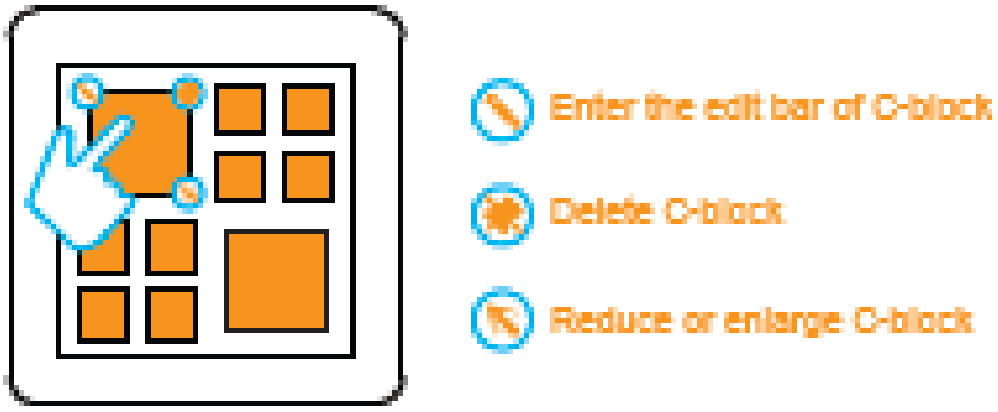
1. There’re many color blocks likes ceramic blocks on the desktop, so we called them C-block. Each C-block functions as a shortcut, which could be linked to widget, app, shortcut or file folder.
2. Location, size, icon, background color of each C-block could be Customized freely; also distance between C-block could be set.
3. User could add or delete any C-block from desktop, also could change theme of the desktop.
4. For more desktop management info, please enter desktop management menu.



More C-block size for you to choose from.

Edit C-block

Tap and hold on desktop will enter editing mode for desktop and C-block, tap any C-block and you will see editing mark on three edges of the C-block. Meantime, you could drag this C-block and place it anywhere on the desktop. Delete C-block, Reduce or enlarge C-block, Enter the edit bar of C-block

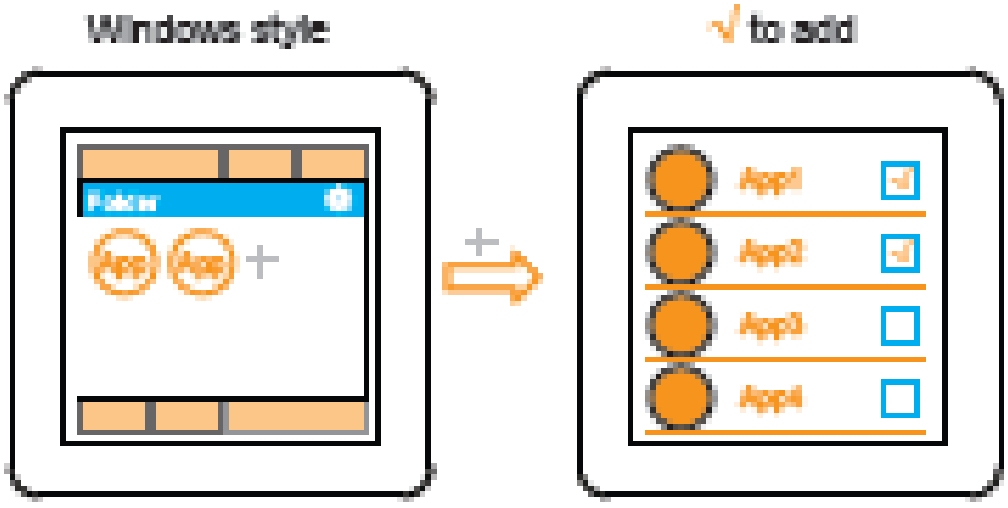


File folder C-block

1. File folder C-block will make it easier for you to manage apps.

2. Tap file folder C-block, you could then add apps to the file folder.

3. You could add more file folders and choose it’s style you like.

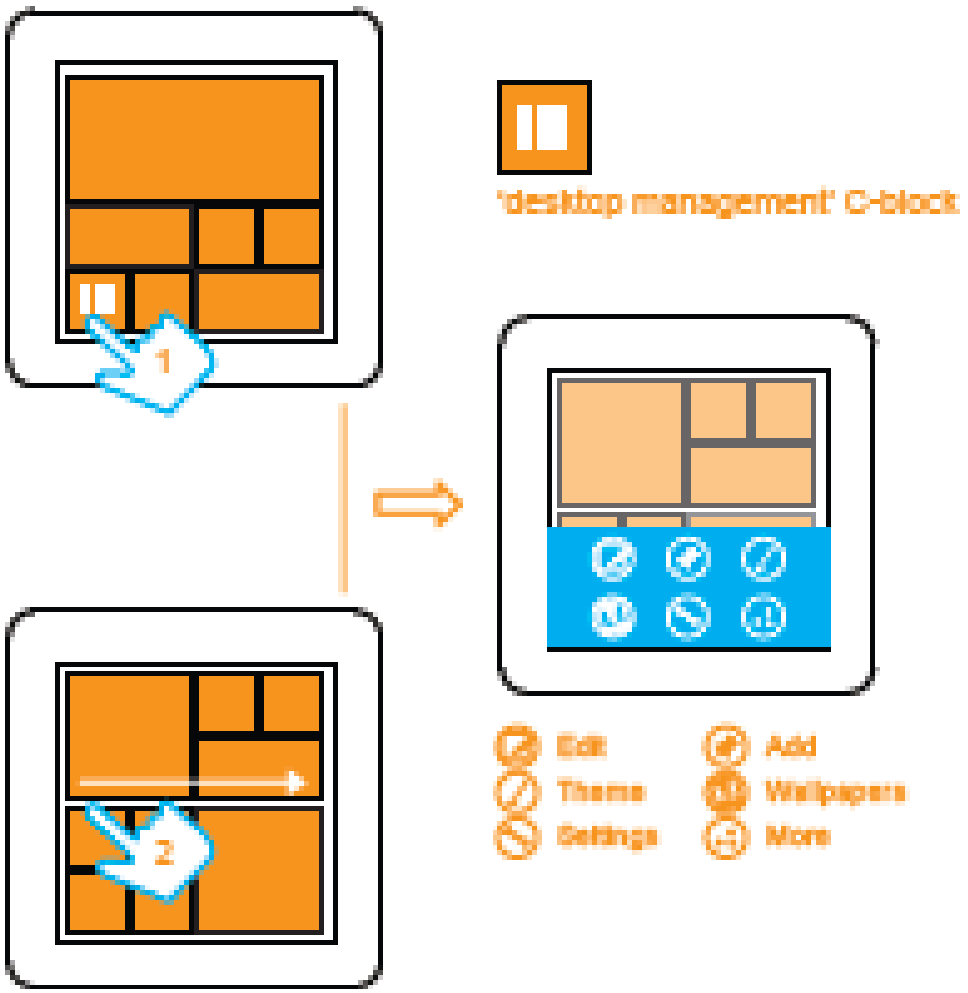


More desktop editing

You could enter more desktop editing through these two methods:

1. To enter through 'Desktop Management' C-block:
In default setting, there's 'desktop management' C-block on the lower left corner of desktop, tap this C-block could enter desktop management menu.

2. Sliding Shortcut to enter.
Under any desktop interface, horizontally slide from left to right on the screen, you will then see the desktop management menu showing up on the bottom of screen.

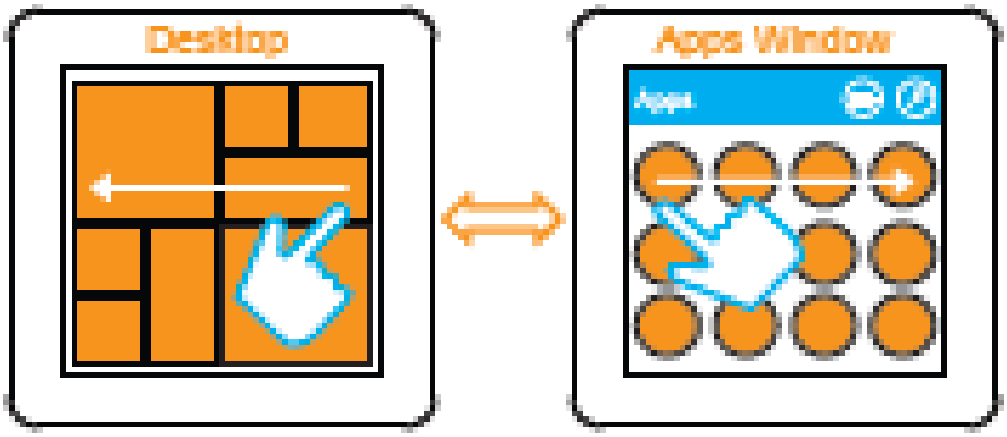


Desktop Theme

1. The overall setting for desktop C-block and wallpaper etc, we call this desktop theme. There’re several basic themes included in the software, which you could treat as reference.
2. In default setting, there’s theme C-block on the lower right corner of desktop
3. You could freely edit and set desktop, and save as your personal desktop theme, this will be your original & unique theme.
4. C-block could not be retrieved if it’s been deleted. Please use the theme retrieve function to retrieve the deleted C-block or add a new.

Switch between desktop and apps window

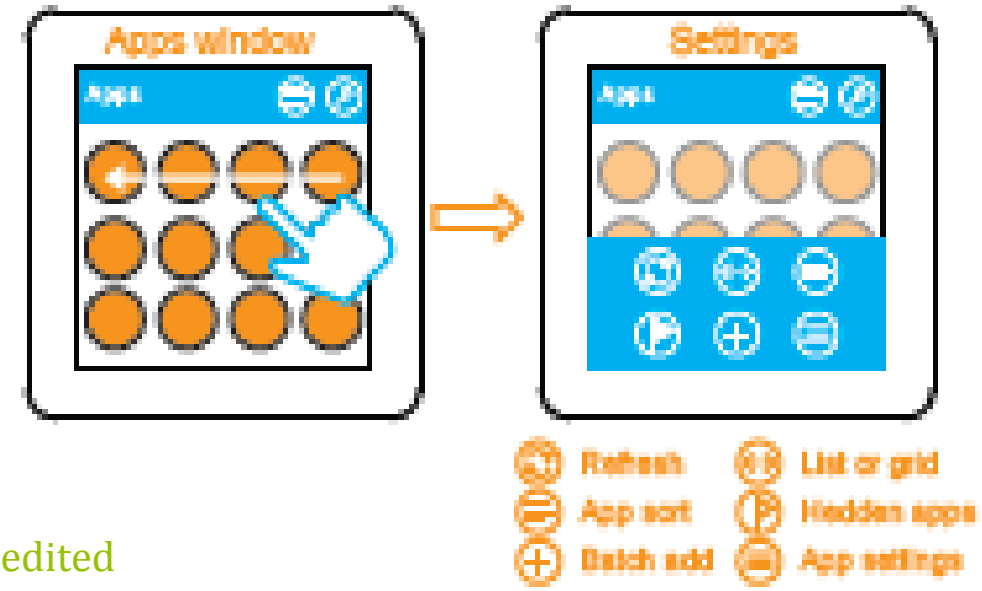
1. Horizontally slide from right to left, will enter apps window.
2. Horizontally slide from left to right, will enter desktop.



Apps Management

Apps window settings

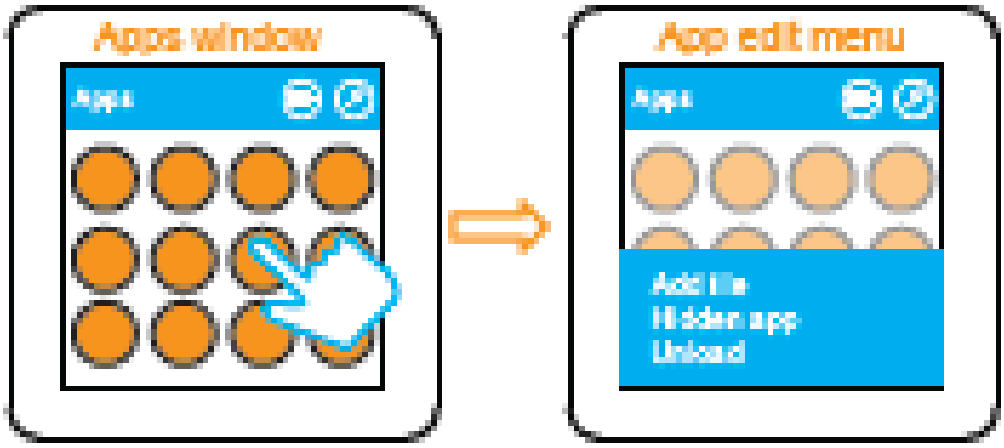
Under apps window , horizontally slide from right to left, you can perform the following operations. Edit Add, Theme Settings, Wallpapers, More



Apps edited

Under apps window , tap and hold on an app icon, the system will pop up the edit menu.

1. If the app installed in system , it can be edited "Add tile" and "Hidden".
2. If the app installed in third party, it can be edited "Add tile" "Hidden" and "Unload".



Updating the software

1. You can download kinds of Apps from Google Play (Note: may be part of the Apps cannot be used normally due to screen resolution compatibility issues.)

2. The software structure may be changed in the new version software, or more applications would be made available, please read the Version Instruction then.

3. This product supports customers' self-developed APPs or gadgets; if you're a developer, please refer to the products' relevant specification & parameters.
